*Monitor Wheel Balancer*

[WWW.CENTURYDISTRIBUTORS.CO.NZ](http://WWW.CENTURYDISTRIBUTORS.CO.NZ)

- Wheel balancer with LCD monitor ideal for high-resolution graphics display.
- Fully automatic cycle with software operating on all types of steel and light alloy wheels for cars, off-road vehicles, light commercial vehicles, motorcycles and scooters.
- Electronic acquisition of distance and wheel diameter up to 26"
- Equipped with software developed in Italy

### KEYBOARD and WEIGHT TRAY

- Control keyboard with a reduced number of keys for quick learning and operation.
- Ergonomic and spacious weight holder tray for counterweights and tools made from high resistant plastic.

### AUTO WHEEL DATA ACQUISITION

- Electronic acquisition of distance and wheel diameter up to 26" with integrated QP-Quick Program function that automatically activates the balancing programs avoiding the use of the keyboard.

### SPECIAL PROGRAMMES

- Hidden weight for splitting the adhesive weights behind spoke.
- Optimisation programme for Rim / Tyre matching for best performance
